Wisconsin Department of Natural Resources - Air Program

June 22, 2017

Three new Air Program supervisors begin next week

The Air Program has filled three supervisor positions. Each will start in their new role on Monday June 26.

South Central Field Supervisor – Barb Pavliscak

Barb received a Bachelor's degree in Civil and Environmental Engineering from Purdue University before starting with the Air Program, Ozone Section. There, she developed state regulations and regional policies. Barb then moved on to permit reviews and compliance work for the South Central Region, followed by several years of work developing the Air Program's computer system, and then several more managing the state's air operation permit program.

Southeast Field Supervisor – Mike Szabo

Mike Szabo has been an attorney with DNR's Bureau of Legal Services for the last 5 years. Prior to joining DNR, Mike worked as a litigation attorney at a law firm in Milwaukee representing engineers and architects from 2007 to 2011. From 1990 to 2005, Mike worked as an environmental health and safety engineer for various companies on projects throughout the U.S. and Canada.

**Compliance Enforcement and Emission Inventory Section
Chief – Maria Hill**

Maria has been with DNR's Air Program for 16 years as an Air Management Engineer located in the South Central Region. Maria routinely worked to implement the EPA Compliance Monitoring Strategy and state enforcement policies while coordinating with Solid Waste, Water, Remediation, and Law Enforcement programs to promote regulatory consistency across the agency.
